Adder ALAV200T-US Full HD VGA Digital Dignage Extender (Transmitter) with RS232/Audio

This listing is for ALAV200T-US Transmitter only. Use description below as a general reference.

The new range of audio video extenders from ADDER deliver high resolution crystal clear video and CD quality digital stereo audio across installations up to 2000ft in width, or 1000ft point to point. With full RS232 support video display panels can be controlled and interrogated remotely, making the AV200 series the ideal professional Narrowcast Digital Signage solution.

The AV200 series is supplied complete with ADDER DM (Display Manager) software. This advanced application makes controlling VDU power, video and audio possible from the transmitter, as well as allowing you to interrogate video panel status and dynamics. Due to ADDER's 'Open Architecture' policy, you can still use any 3rd party signage control system across the AV200 series.

Features

- Crystal clear digital audio quality at 44.1kHz Stereo
- Crisp, sharp, fully saturated video quality even at 1000ft
- Resolution up to 1920x1080@60Hz
