

## Hall Research USB-EXT-16 USB-EXT-16 USB 2.0 Active Extension Cable - 16ft

The USB-EXT-16 is an active extension cable which can be cascaded (up to 5) to extend the distance between USB devices and a PC. It regenerates the USB signal for maximum reliability and performance over extended distances at a maximum transfer rate of 480Mbps.

### Features

- Repeater cable length: 16'
- Cascaded (up to 5) to extend USB distance
- Regenerates USB signal for maximum reliability and performance over extended distances
- Connect to USB device or 2nd active repeater cable

### Specifications

- Interface: USB 2.0
- Data Transfer Rate: 1.5/12/480 Mbps
- Downstream Connector: USB Type A Female
- Upstream Connector: USB Type A Male
- Cable Length: 16Ft (15M)
- Max Units Cascaded:
