Adder CCP2U PS/2 to USB converter cable

DESCRIPTION:

Connect Sun, Mac, laptop or PC (USB) computers to your KVM switch or extender using these neat, intelligent interface cables.

To be used for connecting PS/2 KVM switches and extenders to computers which present a USB keyboard and mouse interface. The CCP2U cable converts PS/2 keyboard and mouse signals into USB and delivers high functionality, multi platform KM connectivity at low cost, and may be used with any PS/2 style KVM switches or extenders. Miniature 'keep alive' circuitry is moulded into the cables to ensure problem free computer operation even if the KVM switch or extender is powered off.

FEATURES:

- Fully moulded robust construction with color coded connectors
- May be used with any quality PS/2 style switches
- Keep aliveâ„¢ circuitry provides increased system reliability
- Keyboard country code reporting ensures Sun compatibility
- Downloadable drivers for different keyboard layouts and future upgrades
