Smartavi SAVI-ST-E300S High Definition Low-Bandwidth H.264 Streamer/Encoder

STREAM ENCODING MADE SIMPLE: SaviStreamer E300 Encoder, Powered by SmartAVI

The **SaviStreamer E300** Encoder is SmartAVI's ideal streaming optimization hardware solution. The SaviStreamer digitizes audio and video signals from connected devices, optimizing them for web-based streaming distribution with low-bandwidth, high speed H.264 formatting. Connectable via HDMI, VGA, and analog ports, the SaviStreamer supports a wide array of media file types and sizes and preps them for web transmission without loss in picture quality or performance.

Built with excellent encoding fail-safes and highly compatible designs for system stacking, the SaviStreamer E300 is the ideal device for any AV specialists who need media content on the web.

Encode Video for Optimized Streaming Over the Internet

SaviStreamer E300 analyzes and converts HD audio-video signals into H.264 formats, which are ideal for web-based distribution at high speeds and low bandwidth consumption. SaviStreamer E300 comes with SaviStreamer Manager software, which lets users modify signal settings to get the best performance possible.

For top-grade encoding for web-based media streams, choose SaviStreamer Manager

Features

- HD H.264 video (1080p at 60fps)
- AV-over-IP support
- Low-Bandwidth, Energy Efficient
- HDMI, VGA, Analog Ports
- Supports wide array of media sizes and types
- Schedule and record live HD content
- Robust Encoding Fail-safes
- Shared network recording
- Stackable, powerful systems
