

Atlona AT-DVI-31 3:1 ATLONA DVI SWITCH (W/ REMOTE CONTROL)

3x1 Atlona DVI Switch. Model: AT-DVI31

Atlona AT-DVI31 is a high performance DVI switcher with remote. Simply press a button on the remote you can select your desired DVI source to be routed to a high definition display. Switcher is tested to guarantee resolution up to 1080p without signal degradation. DVI repeater is built-in for long output cables. If your cable over 15ft distance then with regular switch you would get signal degradation; however with AT-DVI31 signal can will be amplified to go over 60ft.

User Instructions:

Installs in seconds. Connect all the digital video sources to any of the inputs on the switch and connect the output cable to the hdtv display. Use a remote control or buttons on the front panel to switch video inputs. We recommend using high quality DVI cables for the best signal transfer.

Package Includes:
