

PureLink HD-150 HDMI 1x5 Distribution Amplifier HD-150

DESCRIPTION:

PureLink's new HDMI™ distribution amps have one feature you will love... they're legal! With full HDCP decryption for all 5 output ports instead of just the first like all the others, PureLink sets the standard worldwide for HDMI™ signal distribution. In fact, we put it in writing with our exclusive Certification of Full Compliance and Indemnification. No other brand guarantees it's legality in writing. Consumers should be wary of any brand that will not certify its HDCP compliance in writing....they may have something to hide.

The HD-150 is a 1-in, 5-out HDMI™ Distribution Amp that will work flawlessly in your system. Be sure to note the HDCP indicator LED, a PureLink exclusive to let you know when your source and your HDTV are in sync. Insist on PureLink for the highest performance and reliability.
