

# PureLink AD-210 VGA/DVI to DVI Converter With Down-Conversion and Upscaling AD-210

## DESCRIPTION:

PureLink's new AD-210 Converter/Up/Down scaler is a high performance analog VGA &-or DVI to DVI scaler that converts incoming analog RGB and YPbPr signal to DVI. In addition to conversion, AD-210 is capable of Up/Down scaling of the DVI input resolution as well as the DVI output resolution.

Model AD-210 supports the resolution from VGA to WUXGA, 60Hz~85Hz. With AD-210's high quality Sigma scaling IC, the transmission speed of massive HD video data is faster than ever, as well as the processing speed of the incoming and outgoing video signal.

For the user's convenience, the newly designed OSD (On Screen Display) menu options can easily be reconfigured through the front LCD display of the AD-210 or OnScreen.

## SPECIFICATION:

- Supports up to 1900x1200 at 60Hz, 1080P at 60Hz
- 2-in, 1-out Switching
- Upscaling
- Flexible EDID Management
