PureLink HDG-8000 Pro HD Digital / Analog AV Test Pattern Generator HDG-8000 Pro

DESCRIPTION:

Available Now! PureLink's new HDG-8000 is the first complete "all-in-one" handheld test pattern generator to include both analog (RGB, Component, Composite) and digital signals (DVI, HDMI) in one easy to use design. It also includes the option of adding HD-SDI. No other test pattern generator on the market can deliver as much in one single unit, including:

- HDCP Testing – This test for cables and displays is critical to all AV applications
- Comprehensive EDID Testing – allows import/export of EDID setting
- Endless Test Patterns and Still Images -
  26 pre-loaded test patterns, able to upload any test to internal 80Gb HDD
- Full Motion Native 1080p Test Clips – A PureLink™ Exclusive Feature
- Portable and Rugged
- Reliability – PureLink's generator is a precision instrument.. It is used to make sure cables, peripherals and displays are all working correctly. PureLink's HDG-8000 has been field and age tested for over 10,000 hrs to make sure it will output correct signal in any circumstance.

FEATURES:
