

PureLink DCE II Tx HDTools DVI to CATx Extender (Transmitter)/Full HD

This listing is for DCE II Tx Transmitter only. Use description below as a general reference.

The **DCE II Tx/Rx** DVI over CATx Extension System provides reliable transmission and extension of Full-HD video from a DVI source using a single CATx cable. With support for resolutions up to 1920x1200 at distances of 165 ft. and 1024x768 at distances of 220 ft., along with embedded EDID and device recognition, the DCE II Tx/Rx offers a convenient video extension solution ideal for any small-scale, point-to-point presentation or digital signage application.

Features

- DVI extension up to 220 ft (70m) using a single CATx cable
- Supports PC resolutions up to 1920x1200
- Embedded EDID for lossless signal transmission
- Active receiver draws power from the DVI source - no external power required
