

TV One 1T-CT-631A HDMI/ DVI-D + Audio Extender over Cat6 (Transmitter)

Model: **1T-CT-631A - Transmitter**

1T-CT-631A , **1T-CT-632** and **1T-CT-633** constitutes a system used to transmit deep color (12 bits) v1.3 HDMI or DVI-D signals at resolutions up to 1920x1200 and 1080p, plus transmission of embedded lossless audio, over one Cat.6 cable. The 1T-CT-631A/632 HDMI Extender system can achieve signal distribution distances of up to 38 meters (125 feet) for 1080p signals, 50 meters (165 feet) for 720p/1080i signals and 60 meters (195 feet) for 480p signals. This distance can be doubled with the use of the 1T-CT-633 Repeater. Multiple Repeaters may be used for even greater distances. The Transmitter and Receiver feature the unique TV One-task locking power connectors to enhance overall system mechanical security

Key Features of the 1T-CT-631A/632/633 System:

- HDMI Version 1.3a Compliant
- DVI 1.0, HDCP 1.1 Compliant
- Supports xvYCC Protocols
- HDTV Resolutions up to 1080p @ 60Hz
- Up to 125' Distance for 1080p
- Distances can be Doubled using Repeater
- Embedded HDMI Lossless Digital Audio
- Zero signal loss via Cat.6 cable
- Single Cat.6 cable required
- Locking power supply for security
- Ultra Compact Size
