

Galaxy Audio RM-RDSTNR AM/FM Rack Mount Tuner with RDS

The RM-RDSTNR is a professional grade RDS Tuner in a single rack space. The RM-RDSTNR is perfect for permanent Pro A/V installations and touring. Large illuminated buttons are visible in a dark room or when installed in a rack. The illumination can be defeated by a switch on the front panel. The all metal, 1U rack mount chassis is ruggedly built for the road.

The RM-RDSTNR AM/FM tuner includes Radio Data System (RDS) which displays Artist and Song Title information on the front panel display. The 1/8" AUX jack on the front panel allows for the connection of MP3 players, cell phones, or other media devices. The included remote accesses features such FM w/RDS and AM Bands, Sleep, Traffic Auto Scan, Program Type and more.
