

C2G 40913 Wall Plate Amplifier

This amplifier is an ideal solution for schools or meeting spaces. Designed to fit in a decorative wall plate, this small amplifier is easy to install on mobile AV carts and drive external speakers in a classroom, or retro fit a meeting room for audio. The decorative plate can be mounted into a surface mount wall box and can utilize surface mount cable track, such as Wiremold, to connect to wall mount speakers. Either solution offers flexibility and ease of install when a room needs audio reinforcement.

Features:

- 15 watts(RMS) per channel
- Bluetooth Version 3.0 receives signal up to 10 meters
- Class D amplifier
- Connect with Bluetooth or 3.5mm stereo inputs
