Gefen EXT-CAT5-9500HD GEFEN DVI / HDMI KVM EXTENDER 200FT

The CAT5-9500HD sends your digital video display plus accompanying peripherals away from your computer so you can operate in silence or locate your CPU in a safe and secure location.

Industry standard CAT-5e cables are used to connect your computer to the remote devices and distances up to 200 feet are easily achieved.

The CAT5-9500HD supports one DVI digital display, four USB devices and/or PS/2 keyboard/mouse, RS-232 for serial communication systems and two audio devices.

How it works
The CAT5-9500HD sender connects to your computer with the supplied cables. The receiver connects to your DVI displays and peripherals - up to 200 feet away. Multiple CAT-5 cables connect the sender (computer) and receiver (peripherals) to each other.

The CAT5-9500HD is HDCP compliant.
