

Atlona AT-HDMI61 6:1 ATLONA HDMI SWITCH (W/ REMOTE CONTROL)

6x1 Atlona HDMI Switch. Model: AT-HDMI61

Atlona AT-HDMI61 is a high performance HDMI switcher with remote. Simply pressing a button on the remote you can select your desired HDMI source to be routed to a high definition display. Switcher is tested to guarantee resolution up to 1080p without signal degradation. HDMI repeater technology is built-in for long output cables. If your cable over 15ft distance then with regular switch you would get signal degradation; however with AT-HDMI61 signal can will be amplified to go over 60ft.

User Instructions:

Installs in seconds. Connect all the digital video sources to any of the inputs on the switch and connect the output cable to the hdtv display. Use a remote control or buttons on the front panel to switch video inputs. We recommend using high quality hdmi cables for the best signal transfer.
