

Kramer DSP-1 Mini Digital Sound Processor

DSP-1 is a digital sound processor that enables the control of individual volume per input, 3-band parametric EQ, selectable HPF (high-pass filters) at 70Hz and master volume via IP. DSP-1 is a small form factor and cost-effective solution suitable for a range of audio applications.

Features:

- 2-Input Mixing with Master Volume.
- 3-Band Parametric Equalizer — Frequency, Q-factor & gain control per band.
- Hi-Pass Filter — Selectable HPF at 70Hz.
- Line-Level Amplifier for Audio Gain and Attenuation.
- Control with Built-In Web Page & RS-232.
- Creates & Saves Presets.
- Highly Cost Effective.
