

Kramer FV11D-3 HighSecLabs Secure 1-Port DVI-I Isolator

FV11D-3 is a single-port secure isolator for DVI-I video and unbalanced stereo audio. The unit prevents direct contact between the connected computer and its shared peripherals. Maximum security is achieved by keeping the video path separate from the keyboard and mouse even when the unit is powered off.

Features:

- Advanced Isolation Between Computers & Shared Peripherals.
- Unidirectional Data Flow: USB, Audio & Video.
- Power Domain Isolation.
- Secure Administrator Access & Log Functions.
- Always-on, Active Anti-tamper System.
