Datavideo MCU-200S Rackmount Multi-Camera Control Unit - Sony

The Datavideo MCU-200S is designed to control and configure up to four Sony cameras. It can control record and playback functions, user memory functions, shutter speed, iris, white balance, black level, and gain adjustments of the cameras.

Using the included four AD-1 adapters, the MCU-200S can connect up to four Sony cameras via individual RJ-45 connection.

Designed to be able to mount in a 19" rack, the MCU-200S is a great tool to have for outdoor productions where lighting exposure can be varied. The MCU-200S allows constant adjustment of image exposure and color balance of up to four cameras depending on the condition of the environment.
