

Atlona AT19010-2 2M (6FT) SCART CABLE

2M (6FT) ATLONA SCART CABLE. MODEL: AT19010-2

Atlona's Scart Video Cable is a perfect solution for those who want to get the best audio and video quality signal when connecting video devices that use Scart Connection to Video Displays that also use Scart connection. This cable is able to pass Audio and Video Signal of all types that Scart connection can support. All of the 21-pins are connected.

What is Scart: Scart connector is a type of a connection between two video sources. Scart can carry audio and video signal (**stereo, composite video, s-video, component video and RGB**). This type of a connection is mainly used in Europe and Asia.

Description:

Exclusively for our European customers our top end, SCART (male) to SCART (male), triple shielded cable with Gold connectors. Made of pure Oxygen Free Copper (OFC) conductor, it has the characteristics of high conductivity, low signal loss and degradation, low electric resistance and good signal transmission. Triple shielded construction will reduce EM and RF interference to a minimum, while gold connectors will keep a perfectly tight connection. Whether you are running HD (High Definition) signal or SD (Standard Definition) signal, this cable is perfectly compatible to either one. It would transfer Video + Audio on either type of the signal.

Applications:

Ideal for connecting DVD players, VHS players, satellite and cable boxes, LCD's, projectors, Plasma displays, HDTV's and much more.

Specs:

- **SCART male to SCART male**
- 24k gold plated connectors
- Oxygen Free Copper conductor cable construction
- High-density triple shielding for max rejection of EMI and RFI
- **HDTV, ED , SD signal compatibility**
- Video and Audio
