

Gefen EXT-HDMI1.3-144 1:4 HDMI 1.3 Splitter

1x4 Gefen HDMI Splitter (Distribution Amplifier) HDMI 1.3 Model: EXT-HDMI1.3-144

Distribute One HDMI Source to Four Locations

The 1x4 HDMI splitter allows set-top boxes, DVD players, D-VHS players and other HDTV devices with HDMI output to be connected to four or more HDTV displays.

How it works Gefen's 1x4 HDMI splitter is a distribution hub that sends the same video output to four or more HDTV digital displays. It is a flexible solution that accommodates multiple displays. When two or more HDMI splitters are connected together, they can be used to create a larger distribution. The HDMI splitter is connected using a HDMI cable from the HDMI source to the HDMI splitter input. There are four HDMI outputs. HDMI output 1 is the primary connection and is used for the main display. Outputs two, three and four follow the main display.

Note: This HDMI product supports BOTH Audio and Video signals.
