

Osprey 95-00476 PCIe Analog Composite/S-Video Capture Card for Video Only (100e)

Based on the original Osprey 100 capture card, the Osprey 100e is a PCIe analog video capture card that offers high-quality video at a reasonable cost. This low-profile, single-channel card has four switchable inputs (three composite and one S-Video) and is compatible with Microsoft DirectShow applications.

This card is a great solution where audio is not required. The PCIe bus makes it compatible with most modern PCs.

Features

Multiple Card Support

Deploy two or more cards in a single PC chassis for maximum versatility.

Driver Support

- Microsoft DirectShow drivers are available for compatibility with most software.
- Windows SDK lets you create custom applications.

Driver Based Pre-Processing

- Closed-caption extraction/rendering
- Logo/bitmap overlay
- Scaling, cropping, de-interlacing and inverse telecine
