

Osprey 95-00474 PCIe Composite/S-Video Capture Card/Audio/SimulStream (260e)

The Osprey 260e video capture card is a single channel card that supports composite, component, and S-Video inputs along with balanced or unbalanced stereo audio.

Features:

Single Channel With Switchable Inputs

- 1 composite (BNC x 1)
- 1 S-Video (mini-DIN)
- 1 component (BNC x 3)

Audio

- Balanced stereo (XLR x 2)
- Unbalanced stereo (RCA x 2)

Audio Loop out

- Stereo (3.5 mm)

Multiple Card Support

- Deploy two or more cards in a single PC chassis for maximum versatility.

Driver Support

- Microsoft® DirectShow® drivers are available for compatibility with most software.
- Windows SDK lets you create custom applications.

Driver Based Pre-Processing

- Closed-caption extraction/rendering
- Logo/bitmap overlay
- Scaling, cropping, de-interlacing and inverse telecine

Osprey SimulStream® Ready (included)

- SimulStream is Osprey feature which allows each input to produce multiple parallel output streams with completely independent settings for color space, cropping, scaling, closed caption and overlays facilitating simultaneous delivery to multiple applications.
