

Atlona AT-AVSC41 ATLONA 4:1 VIDEO/S-VIDEO/COMPONENT VIDEO SWITCH (AUTOMATIC)

4x1 Component Video / S-Video / AV Auto Switch. Model: AT-AVSC41

Atlona's 4-in 1-out component, s-video and av switcher is the ideal box for all of your devices, offering both high-definition video / standard definition and analog/digital audio switching capability. The AT-AVSC41 can be operated in 2 modes: Auto Mode or Manual Mode. Auto Mode: AT-AVSC41 will switch to a first available source, basically if the source is turned on, then switcher will automatically sync to it, as soon as you turn the source off and turn another one on, the switcher will jump to next source available. Manual select button can override inputs.

Inputs & Outputs:

- Inputs: 4 x Component Video (YPbPr), 4 x Stereo Audio inputs and 4 Digital Coaxial Inputs.
- Outputs: 1 x Component Video (YPbPr), 1 x Stereo Audio inputs and 1 x Digital Coaxial Inputs.
