Osprey 97-00003 4 Channel SDI MVS-3 Multi Viewer

One or more inputs can be scaled and directed to the outputs in a variety of layouts. All inputs are resolution and frame rate independent. In addition, audio bars can be overlaid on each channel for quick signal monitoring. Text overlay can be customized for each input and as an additional feature input resolution display can be enabled or disabled.

The three parallel Outputs (2x 3G-SDI and 1x HDMI) support Up and Down Scaling and frame rate conversion.

MVS-3 can be configured via LAN. It also features external dip-switches for manual configuration.
