

BOXLIGHT N12 LNH N12 Laser Non-Interactive HD Ultra Short Throw Projector (3300 Lumens)

This listing is for N12 LNH Projector only. Use description below as a general reference.

N12 Laser Non-Interactive HD Ultra Short Throw Projector (3300 Lumens)

Get HD interactive imagery as large as 102 inches and create a collaborative touch-enabled area with our P12 LTH laser projector. All this, plus the reliability of lasers, which means no bulbs to change-ever.

The P12 LTH 1080P provides twice the pixels of a conventional laser projector. The touchenabled interactivity is second nature to today's students, so students and teachers are up and running in minutes.

This ultra-short-throw projector brings collaborative, 10-touch* interactivity** to your classrooms, with images as large as 102 inches! Now your classrooms can experience largescale interactivity that wouldn't have been in your budget when considering displays.

There's no lamp to fail or change, and a 20-year laser lifespan.***

Features:

- Complete education solution-comes with easy-to-learn and easy-to-use MimioStudio™ classroom software.
- Software and MimioMobile™ app enable collaboration and assessment either at the front of room or on almost any student device.
- A solution that makes it easy to gauge and personalize student learning.
- Laser projection means no bulbs to change-ever.
- Analog and digital audio/video connections ensure compatibility with virtually any PC.
- Ethernet LAN connectivity for central management and control

* Multi-touch works on Windows only.

** Also available in pen-only and non-interactive models.

*** Defined as a typical school year of 200 days with 5 hours of use per day
