

## TASCAM TM-280 Studio Condenser Microphone/20Hz-20000Hz/1 kOhm

A fine microphone is the doorway to a great recording, and TASCAM's **TM-280** Studio Condenser Microphone has been designed to capture each and every nuance of your performance faithfully and accurately. Featuring a switchable high pass filter and a 10dB pad, this large diaphragm condenser microphone is sensitive enough for the most demanding acoustic sessions while being robust enough to handle the most powerful rock and roll.

A complete studio package, the TM-280 microphone kit includes a rugged foam-lined case, and a custom designed pop filter that mounts directly to the professional quality shockmount.
