

# TASCAM VL-S3BT 2-Way 3 inch Powered Monitor with Bluetooth (Pair)

TASCAM's new **VL-S3BT** bring great-sounding compact studio monitoring to the price of a set of headphones. The 2-way powered monitors include a 3" woofer, and rear ported design packs a surprising punch.

A pair of RCA inputs accept any line-level input, and a stereo 1/4" to RCA cable is included. Also available is a 1/8" stereo mini jack for playing from smartphones or MP3 players.

The efficient 14W per side stereo power amplifier drives the two monitors. The compact, ported cabinets fit almost anywhere. Ideal for home studios, dorm rooms, or video editing suites, the VL-S3BT is an affordable solution for great-sounding mixes.

The VL-S3BT builds a great-sounding Bluetooth receiver directly into the speakers, for wireless playback from smartphones, tablets, and other devices.

## Music playback over Bluetooth®

Transmission protocols, called profiles, are standardized for the purpose of wireless transmission via Bluetooth®. VL-S3BT uses the profile A2DP (Advanced Audio Distribution Profile), and can wirelessly play back from devices compatible with A2DP. Furthermore, the sound is compressed for wireless transmission. This compression method is called "codec." Confirm which codec your device is compatible with on the webpage describing your device.

## Features

- Power amplifier output: 14W + 14W (LEFT speaker contains the power amplifier)
- 3-inch woofer/0.5-inch tweeter
- Bass reflex port
- Specially tuned 8kHz crossover circuit
- RCA terminals(stereo) and 3.5mm stereo mini unbalanced input(the stereo 1/8" mini jack is preferred)
- Volume control
- Power switch/Power LED
- Dedicated AC adapter included (TASCAM PS-P1524E)
- RoHS certified
- Pairing button of Bluetooth® on front panel
- Bluetooth® wireless playback function by A2DP profile
- Supported A2DP codec : SBC/AAC/aptX®
