

## TASCAM RC-F82 8-Channel Fader Controller for HS-P82

Adding to the mixing facilities of TASCAM's HS-P82, the **RC-F82** is a mix controller, fader controller and talkback system for location recording applications. Eight 100mm faders control the 8x2 mixer or preamp trim on the HS-P82, allowing a stereo mix to be recorded in addition to the eight discrete tracks. Eight encoders can control trim, level or stereo pan. In addition to control, the RC-F82 has audio input and output routing with talkback for on-set communication.

For reliable on-set recording with mixing and communication, the combination of the HS-P82 and RC-F82 can't be beat.
