

TASCAM LA-40mkIII 4-ch Unbalanced to Balanced/4-ch Balanced to Unbalanced Converter

The new model include a ± 12 dB trim control for better matching of levels between components. A signal present LED proves useful during system design and troubleshooting. The new model is packaged in black rack cases with standard chassis depth for easier wiring. The LA-40mkIII has four channels of unbalanced to balanced and another four channels of balanced to unbalanced out.
