

Nexto DI NVS2801-Plus-2TB Portable All in One Backup Storage with 2TB SSD

Nexto Video Storage Doc+(NVS2801-Plus) can back up your memory card after filming a high quality video. Its 430g of light weight and compact size is perfect for shooting documentary which require frequent movements. NVS2801-Plus can preview backed up 2K/4K video, allowing you to check the integrity of your recorded footage immediately.

2TB SSD is included

Light and Compact

At 430g lightweight and compact size, the ease of portability makes it a perfect companion especially for a documentary director.

Backup various memory cards at the shooting site

The built-in memory card slot allows instant copying of SxS, CFast, SDXC / SDHC / SD cards. Also, a memory card adaptor (purchased separately) can be connected through the SxS slot to back up P2/P2E, XQD card. In addition, NVS2801-Plus supports USB card reader without an external power source. Thus allowing you to backup various types of memory cards from different cameras without the need of a computer.

Internal Drive with Unlimited Capacity

NVS2801-Plus has unlimited storage in that users can easily switch out the internal drive. You can install a 2.5" SATA hard drive (or SSD), but the thickness of internal drive should be less than 9.5mm.

Achieve 100% safety with Multi-copy (M-copy)

Connect USB external drive to NVS2801-Plus. NVS2801-Plus simultaneously copies memory cards to internal and external drives at the same time. M-copy technology minimizes copying time with parallel processing. Two backups ensure 100% data safety.

Now Supports SSD allowing for Lightning Fast Backup

Designed for SSDs, the NVS2801 offers the world's fastest copying speed. With the NVS2801-Plus, you get an incredible 430MB/s copying speed which is twice as fast as the NVS2801.

Preview 2K/4K

NVS2801-Plus has 2.4" color LCD and an audio jack which allows you to monitor backed up FULL HD/4K video on the fly. In other words, you can immediately check that your video was backed up safe and sound.
