NTI e-3gu-4 USB 3G Modem

USB 3G Modem

The E-3GU-4/-3GU-5 Modem is used to enable SMS alert messages to be sent from an ENVIROMUX Enterprise Environment Monitoring System (SYSTEM) to any user's cell phone or device capable of receiving SMS messages. Before connecting the modem to the SYSTEM, a GSM SIM card configured for SMS messaging must be installed to the modem following instructions from the modem manufacturer.

Features:

- Sends SMS text messages to a pager or cell phone when a sensor goes out of range of a configurable threshold.
- Use to access the ENVIROMUX web interface.
  - The SIM card must have a "public" IP address for full control of the E-2D/5D/16 through the modem.
- SIM card supporting SMS messaging required (not included).
- Supports third generation (3G) digital cellular standards.
- USB 2.0 stick with Male USB Type A connector
- 3G network band: HSPA+/HSUPA/HSDPA/HSPA/UMTS(WCDMA)-2100 MHz.
- 2G network band: GSM/GPRS/EDGE-850/900/1800/1900 MHz
- When connected to the ENVIROMUX system, protrudes 2.68" from the edge of the case.
- Compatible with E-2D/5D/16D.
  - Not compatible with E-SEMS-16U.
- Will ship with either a white or black case.
