

# SECO-LARM E-941SA-1K5Q Single-door Electromagnetic Lock with 1500-lb (680kg) holding force

The E-941SA-1K5Q 1,500-lb Single-Door Electromagnetic Lock is the ideal way to secure a door against unauthorized entry. When power is applied to the electromagnetic lock, it creates an extremely strong magnetic field. The electromagnet is strongly attracted to the steel armature plate which is mounted on the secured door. Once the electromagnet is deactivated, the secured door will function normally without any residual magnetism.

## Features

- 1,500-lb Holding force
- Selectable 12/24 VDC operation
- Anodized aluminum housing (US 28)
- Keyhole slot mounting plate makes installation easier
- No residual magnetism
- MOV surge protection
- Detachable faceplate for easy wiring access
- Complete mounting hardware included for typical installations
- "Z" brackets, "L" brackets, "U" brackets, and plate spacers available for easy mounting
