

Atlona AT-HDMI-V42 4x2 HDMI Switch with 3D Support

4x2 Atlona HDMI Switch with 3D Support

Model: AT-HDMI-V42

The Atlona AT-HDMI-V42 is a high performance HDMI switcher with remote control. AT-HDMI-V42 is built on the HDMI 1.3 platform and can pass resolutions up to 1440p and lower (such as 1080p, 1080i, 720p and more). Switcher allows your various HDMI sources to share two HDTV displays. Atlona 4x2 selector is great product for current and future technology as it can support resolutions that don't even exist yet and of course all the current one's. Simply pressing one button on the remote or front panel you would select the desired HDMI input to be displayed on both HDTV displays.

Note:

- Atlona AT-HDMI-V42 is based on the Silicon Image Chip-Set. This is the best rated chip-set for 4 by 2 switching applications that require reliable sync and constant signal.
- Both outputs on the Atlona AT-HDMI-V42 are mirrored, which means that both outputs would be active at all the time and sending same signal. If you do need to send different sources to different displayed, please look at our HDMI matrix switcher line.

Key Features:

- **3D Capable**
- HDMI Switcher based on HDMI 1.3 technology
- Dual HDMI Output, to use with multiple HDMI displays
- Supports 30/36/48 bit color depth display.
