

# SECO-LARM PS-U0906-PULQ 12VDC Distributed Switching CCTV Power Supply Panel Box/9 Outputs/6A

SECO-LARM's line of 12VDC switching CCTV power supplies is the cost-effective way to power multiple cameras and is perfect for many security system and access control applications including integration with alarms. These switching power supplies provide an adjustable 12.6~13.5 VDC output.

These models include individual Positive Temperature Coefficient (PTC) fused outputs and individual status LEDs, as well as surge protection and input fuse to provide a high level of protection, all packaged in a tough metal enclosure.

## Features

- Universal 100~240 VAC input
- New lightweight, cost-effective design
- Each output individually fused (PTC-type fuses)
- Adjustable output to reduce voltage drop (12.6~13.5 VDC)
- PTC Fuses rated 2.5A@30VDC
- Individual output status LED indicators
- Heavy-duty steel case with removable cover
- Built-in short circuit and overheat protection
- 6-foot power cord included
