

SECO-LARM SD-996A-D3Q Electric Glass Door Strike - Fail-secure

The SECO-LARM Electric Glass Door Strikes can be installed on frameless glass doors to provide electronic access-controlled locking system. The strikes can be used on 3/8" (10mm) or 1/2" (12mm) glass doors, are non-handed, and are available in either fail-safe or fail-secure models

Combine with an optional SECO-LARM digital keypad for keyless high security.

Features

- Easy installation on top or side of door
- Reversible, non-handed design
- Horizontal faceplate adjustment to help overcome misalignment
- Suitable for office-type applications
- Fail-secure (door locks when power is lost) operation
- Non-polarized connection
- For use on 3/8" (10mm) or 1/2" (12mm) thick frameless glass doors
- Combine with an optional digital keypad

■ *Note: This strike is not weatherproof and should only be installed indoors.*
