

# SECO-LARM SD-997A-GBQ 12/24 VDC Electric Deadbolt Fail-secure Operation

SECO-LARM Electric Deadbolts are designed for hollow metal door frames. They are not recommended for wooden door frames. However, the door can be wood or metal.

## Features

- Adds concealed deadbolt security to most wood or hollow metal doors, with the convenience of electrical operation
- Incorporates manual lock/unlock cylinder to operate the **SD-997A-GBQ** if power is lost (turn lock knob from inside protected premises and/or use key from outside protected premises)
- Stainless steel bolt, 5/8" diameter, 5/8" throw
- Fail-secure operation (locks if power is lost)
- Magnetic switch senses door position for positive locking
- Includes control wire which allows for releasing without cutting unit's power
- Attempts to relock multiple times if the door is not closed properly to prevent the solenoid from burning out. Once the door is closed properly it will automatically lock
- Over-current protection 1.5A.
- Door open/close monitor (NO/C/NC)
- Adjustable door lock delay timer (0,3,5, or 9 seconds)
- Use with an optional digital keypad for high security without a key. Easily connects to **SECO-LARM** Digital Keypads
- Suitable for office-type applications
- Shallow design for use with most metal door jambs
- Multi-directional horizontal or vertical mounting
- Powered by a solenoid
- Stainless steel for strength and long life
- Plug: Special conic cavity stainless steel (thickness 1.5mm~1.8mm)

\*The **SD-997A-GBQ** is designed for hollow metal door frames. It is not recommended for wooden door frames. However, the door can be wood or metal.

Note: **SECO-LARM** also provides an electric deadbolt for Fail Safe operations, the **SD-997B-GBQ**.
