

SECO-LARM VC-3BAQ BNC to VGA Converter/Up to 1280x1024 resolution

The BNC to VGA converter allows a display with a VGA input to display BNC video signals. Traditional CCTV monitors can now be replaced by any display unit with a VGA input, including most LCD monitors.

The converter is compact and can be mounted nearly anywhere. For example, the included VESA bracket mount can be installed onto most VGA monitors with VESA mounting holes.

Features

- Converts almost any VGA monitor into a security monitor
- Dual output for VGA and BNC
- Compact, unit is perfect for plug and play installations
- Desktop, wall, or VESA mountable (VESA mount included)
- On screen display (OSD) for image adjustment
- Automatically detects NTSC/PAL
- Video input auto-configure
- Memory retains settings after power failure
- Gold-plated BNC connector for longer life
- Supports resolutions up to 1280x1024
- Includes 5VDC power supply
