

Patton TKIT-MODE-1G TD-6010 (1ea) Optical Mode Conversion/MM to SM/1.25Gbps/1310nm

TD-6010 (1ea) Optical Mode Conversion, Multimode to Singlemode, 1.25Gbps, 1310nm, Includes AC Power Adapter

Even though we deal with rocket scientists, this is NOT rocket science. So we are making it as simple as possible. One SKU gets you everything you need to improve your system from copper to fiber. Just pick your system...

The FiberPlex Technologies 'TKIT' bundles takes the incredible flexibility of our TD-6010 12.5 Gbps workbox and bundles it with a set of application specific SFP modules to create a simple, easy to order solution for your specific application.

Features

- Connect your multimode and singlemode systems together seamlessly
- Preserves the life of your fiber equipment and/or fiber plant
- No configuration required
- Supports a wide range of data rates
- Available with a variety of mounting options including DIN rail, NEMA enclosures and 1U rack tray mounting
- AC Power Adapter Included
