

# Icron 300115 USB 3.0 Spectra 1-Port Active Copper Extension Cable up to 15m

The USB 3.0 Spectra™ 3001-15 is a rugged grade single-port USB 3.0 SuperSpeed active copper extension cable, a perfect short-range extension solution when up to 15 meters distance is required for your application. The Spectra 3001-15 cable supports throughput of 5Gbps, features a locking USB 3.0 port delivering 900mA power, and is bus powered so no external power outlet is required. This cable is well suited for AIA USB3 Vision™ camera applications, and comes with a two year warranty. Note: backward compatibility to USB 2.0/1.1 is not supported.

This product received silver honor distinction from Vision Systems Design at the first annual Innovators Awards held in Chicago, IL during the Automate Show on March 25th.
