

Icron 5353 KVM/DVI/USB 2.0 Extender (Transmitter/Receiver) Set over CAT5e/6/7 up to 100m/330ft

The EL5353 KVM Extender System features the latest and most robust HD video and USB extension technology from Icron Technologies. The EL5353 lets you place a computer up to 100m (330 ft) away from a workstation using a single CAT 5e/6/7 cable. The system supports full HD video and USB 2.0, providing the ability to control keyboards, mice, flash drives, audio peripherals and other USB 2.0 and 1.1 devices.

The EL5353 extends DVI uncompressed HD video, audio and USB 2.0 up to 100 meters. This KVM extender can be used in applications for proAV, interactive digital signage, medical and industrial environments. The video resolution is 1920 x 1200 with 24-bit color depth and it can support USB 2.0 throughput up to 40 Mbps. The video quality remains high even at the full 100 meter distance.

Features

- Point-to-point video and USB extension up to 100m over a single CAT 5e/6/7 cable
- Full uncompressed 1920 x 1200 resolution HD video
- 24-bit color depth
