Zigen ZIG-BF HDMI 2.0/HDCP 2.2 Corrector and Advanced EDID Manager w WebOS Interface

The ZIG-BF is a 4K60 4:4:4 600MHz 18Gbps capable device built for system integrators to solve the problem of compatibility as new 4K UHD content comes to market. By supporting the max bandwidth and data transfer rate of the HDMI2.0a standard addressing EDID, Clock-Stretching and Re-Clocking the signal before sending it to the display - the Buffer will solve all your UHD headaches. The ZIG-BF will save you time, money and the headache of explaining why the TV you sold to your customer doesn't work.

If you ever connected a UHD Satellite STB, Sony FMP-X10 UHD player or NVidia Shield UHD Netflix account and got the message: "Not Supported" make sure you never see it again with The Buffer!

Features:

- 4K60 4:4:4 600MHz 18Gbps to 4K60 4:2:0 300 MHz 10.2Gbps conversion
- Clock-Stretching Corrector
- Advanced EDID Management - 22 preset tables, plus custom EDID tables.
- Full Strength Signal Re-Clocking
- WebOS - simple connect, via any browser type
- Digital Audio De-embedding from the HDMI signal
