

Covid CLR-D29125SMOSP-2KB Cleerline Fiber Duplex OS2 Plenum Cable - 2000ft Box

Cleerline SSF™ fiber Duplex cable is composed of two strands of OS2 cable in a zipcord style with an overall 3.0mm Plenum jacket.

Cleerline SSF™ Duplex cable is stronger, safer, and faster to terminate than typical fibers. Increased bend insensitivity and tensile strength is achieved via the integral polymeric coating at glass level. Cleerline SSF™ fibers are compatible with all common connector systems on the market for standard 50/125 multimode and 9/125 Single mode fibers.

Features

- High mechanical strength and superior fatigue & durability
- Integral coating eliminates stripping, provides glass protection
- Bend longevity for 10,000X longer life time than normal fibers
- Increased safety factor due to the incredible bend insensitivity
- Glass fiber remains protected at all times from the elements
- Simplified termination process designed for ease of use
- Ultra low Attenuation loss on tight bend radius
- Exclusive 250um Soft peel jacket identifier
- Length - 2000ft

Applications

Inter-building and intra-building voice or data communication backbones requiring 3.0mm jacket diameter. Install in ducts, underground conduits or aerial/lashed.
