

# Covid EHF-210 HDMI 2.0 4K Fiber Pigtail Extender (Transmitter/Receiver) Set/1SC/18G/400m

These 4K optical pigtail extenders make it easy to connect HDMI devices over extended distances using optical fiber cable. Distances up to 1000 meters (3200 feet); are possible when pairing these pigtails with Covid's multi-mode fiber cables.

This product ships complete with (1) Source Fiber Pigtail, (1) Display Fiber Pigtail, (2) USB Power Cables, (1) Fiber Test Cable and (1) Manual/Quick Start Guide.

## Features

- Full 18 Gbps bandwidth (HDMI 2.0 - UHD, 60Hz, 4:4:4, HDR)
- Up to 1000 meters (Over 3200ft.)
- Simple pigtail design
- Pair with Covid standard fiber cables for a quick and easy field termination

## Why Use This Product?

**Distance:** These extenders can extend an HDMI signal up to an amazing 3200ft. using Covid's multi-mode fiber cabling.

**Compact Pigtail Design:** The simple pigtail design allows these extenders to be small/lightweight, flexible and easily hidden out of sight after installation.

**Fiber Optics:** Because these pigtails transfer the signal over fiber optics, the incredible distances can be achieved with no resolution loss offering a 4K Ultra HD experience.

## Applications

These Fiber HDMI 2.0 extenders can be used in applications that require a 4K HDMI signal to go over great distance. Since they utilize a small pigtail design they can be hidden out of sight and easily fit behind display devices.
