

Zigen ZIG-DAC DTS/Dolby Digital to Analog Audio Converter

The ZIG-DAC allows user to down-Mix DTS/Dolby digital audio from digital coax to two channel stereo while maintaining highest possible quality. The Dolby Digital & DTS 2.0 function guarantees that Dolby digital/DTS2.0 audio signals are down-mixed to analog stereo without loss of quality. This unit is perfect for use with HXL-88 and HXL-44 matrices routers.

Features
