

## **Electro-Voice ZXA190B120V 8 inch 2-Way 800W Powered Loudspeaker/90x50 Degree Coverage Pattern (Black)**

The ZXA1 from Electro Voice is a compact and lightweight powered loudspeaker, ideal for use in clubs, houses of worship, and more. The cabinet houses an 8" high-output woofer and a 1" true compression tweeter to provide a wide frequency response. The internal 800W power amplifier delivers a high-energy performance with low distortion for crisp, clear audio. The speaker provides a 90 x 50° , coverage pattern, and has a rotatable horn design for terrific flexibility. The rear panel has mic and line level inputs, allowing you to connect a wide variety of microphones, instruments, music players, mixers, and more. A selectable high-pass filter allows you to use the loudspeaker with a subwoofer for enhanced bass response. The speaker weighs under 20 pounds and has an integrated handle for easy mobility. A pole mount socket lets you mount the unit on a standard speaker pole.
