

Niles ES2 Wall-Mount Extender (Transmitter/Receiver) System for iPod up to 100m

The ES2 Extender System consists of a pair of wall plates that allow an iPod to be placed up to 100 meters away from an IntelliControl® ICS, or Niles ZR-6 MultiZone Receiver. The input plate has a 30-pin connector for the iPod (must use Niles to iPod cable supplied with your Niles System) and a connection for the power supply. The output plate has a 30-pin connector for connecting to a Niles System. Both plates have two CAT-5 connectors on the back that carry audio, data and other signals between them that allow you to listen to and control your iPod.

Niles manufactures the industry's most complete line of custom installation components and accessories for audio/video systems. To see the complete Niles product assortment, visit us on the Internet at www.nilesaudio.com.

Features:

- Extend the reach of any IntelliControl ICS or ZR-6 MultiZone receiver, to an iPod from 2 meters to 100 meters
- Balanced/differential audio to preserve audio quality and reject noise and hum pickup
- LEDs on the input and output wall plates indicate that the 12V power supply is connected and the output wallplate is connected
- Includes power supply and 30-pin cable
- Power connection is available on both the front and back of input plate
