

Niles GSS70V 70v transformer kit/available for the GSS10

The Niles GSS70V is a specially designed commercial grade exterior in-line distribution transformer for 25v, 70v, and 100v use. Its easy-to-install, hasslefree, weatherproof design allows you to simplify your loudspeaker wiring installation.

By using the GSS70V, you can install any standard 8 ohm loudspeaker and supply the sound using a 25, 70 or 100v amplifier. Its simple switch selector knob lets you instantly adjust from any of the most popular 70v tap wattages of 7.5W, 15W, 30W, and 60W.
