

Niles NI-GSBSUB-12 12 inch In-Ground Subwoofer/8 Ohm/28Hz-100Hz

The Niles NI-GSBSUB-12 12" In-Ground Subwoofer features a waterproof HDPE enclosure which is dunk tested before shipment to ensure against leaks. The port and canopy assembly is designed to move air in an even 360-degree pattern, while the woofer magnet is placed on the vented side of the enclosure to leverage woofer-cooling airflow for motor structure longevity. The critter-proof aluminum mesh grill cover allows for maximum air flow while protecting the entire port assembly against bugs, animals and debris.

Features

- 12" (300mm) Mica-injected Polypropylene cone woofer with NBR Surround
- Waterproof HDPE enclosure
- Buried Enclosure with critter-proof port assembly
- Optimized for use with GS-4 or GS-6 landscape speakers
- Sensitivity: 86dB
- Frequency Response: 28Hz-120Hz +/- 3dB
- Power Handling: Up to 500W
- Nominal Impedance: 8 ohms
