

Electro-Voice EVID3.2 EVID Series 150 Watt 2-Way Speaker (Black/Pair)

The EVID 3.2 is a very compact full-range loudspeaker ideal for indoor and outdoor applications requiring high-quality sound. Its shape and size make it nearly invisible for use in background/foreground music systems for restaurants, bars, patios, retail, and other applications

The 3.2's three-dimensional elliptic baffle symmetrically locates the .75" Ti direct radiator high-frequency element in front of and between the 3.5" low-frequency drivers. The careful shaping, location, and 10° splaying of the LF units provide coverage control by the resulting line array. Lobing is controlled by physically "shadowing" the LF transducers from each other over the bandwidth where they would normally exhibit interference. EVID's mounting system provides greater range of aiming angles in both horizontal and vertical planes than other types. The curved grille features designed-in weather resistance and a hidden leash for safety

All models are available in black or white, and can easily be painted to match the décor. Transformer versions are also available for constant voltage systems.

Features:

- Line-array enhanced coverage control
- Organic, unobtrusive shape
- Strong-Arm-Mount™ for easy, flexible aiming
- Full-bandwidth overload protection
- Weather resistant - Conforms to Mil Spec 810 and IEC 529 IP 34
- Dual LF transducers for extended bass and greater power handling and output
- Ti direct-radiator HF transducer, Neodymium structure
- High sensitivity
- Magnetically shielded
- Zinc-plated grilles
- Transformer Versions
- Color: Black
