

Electro-Voice IP10DTB 250W Transformer Input Panel for 10 inch Subwoofer (Black)

The black Electro-Voice IP-10D-TB is a 250W transformer input panel designed to offer selectable voltage/wattage modes for system designers, installers, and audio engineers using EVID-S10.1D 10" subwoofer cabinets for background and foreground music in stores, clubs, eateries, schools, and more. It installs without modification to your speaker cabinet and can be easily switched out for other input panels.

It features a stereo/mono switch to accommodate different amplifier and speaker configurations. Connectivity includes one Euroblock full-range input and a Euroblock full-range output, which can be wired to feed multiple speakers.

Features:

- Fits Electro-Voice EVID-S10.1D 10" subwoofer cabinet
- Easy installation requires no modification to cabinet
- Switchable stereo/mono mode
- One Euroblock full-range input
- One Euroblock full-range output
- Switchable voltage/wattage mode
- Color: Black
