

Electro-Voice EVID6.2T EVID Series 70V 2-Way Speaker (Black/Pair)

The ElectroVoice EVID 6.2T is a full-range installation speaker, sold as a pair, and suitable for use in bar, bistro, retail, and outdoor venues where space is limited. The dual 6" woofers offer the bass response of a much larger speaker, and the 1" waveguide-coupled titanium tweeter delivers controlled mid and high frequency reproduction. The speaker offers a 300-Watt power handling capacity, and is supplied with a 70V/100V transformer.

The proprietary cast-aluminum SAM (Strong-Arm Mount) assembly for the EVID 6.2T allows for flexible placement and directivity in surface or ceiling mounting design, and the weather-resistant enclosure and magnetic driver shielding allow for reliable outdoor placement and close proximity use with video or computer monitors.

Features:

- Rugged surface-mount weather-resistant installation monitor in black finish with transformer
- Dual 6" woofers with magnetic shielding for extended low end reproduction and close proximity use with video and computer monitors
- 1" Coherent Coverage Waveguide Horn tweeter for even dispersion of mids and highs
- Titanium dome tweeter with neodymium magnets
- Wattage taps for speaker include 7.5W(70V only)/15/30/60W
- Dual bass ports for greater low end clarity and definition
- Treated woofer cones, durable zinc-plated steel grille
- Cast aluminum Strong-Arm Mount (SAM) with 100° of swing and 90° of rotation positioning options
- Color: Black
